Projects

Student Management System for ATI Tangalle (Final Individual Project)

PHP | MySQL | HTML | CSS | JavaScript | GitHub

Developed a comprehensive web-based student management system to manage students, teachers, courses, attendance, finance, library, hostel, and transport operations.

- Implemented CRUD operations using PHP and MySQL with prepared statements for security.
- Designed a responsive user interface with HTML, CSS, and JavaScript.
- Integrated Chart.js for dashboard visualizations.

Library Management System (DBMS Assessment Project)

MySQL | PHP | HTML | CSS

- Built a database-driven library management system to manage books, members, and borrow records.
- Designed ER diagrams and normalized database tables using MySQL.
- Implemented search and report generation features.

Hospital Management System (Individual Project)

Microsoft Access | DBMS

- Created a database management system for a hospital to manage patients, doctors, appointments, and medical records.
- Designed tables, queries, forms, and reports using Microsoft Access.
